Dear Hiring Manager,

As a student who studied Mathematics and Computer Science student at the University of Toronto with a strong background in software development and data analysis, I am confident in my ability to contribute to the company.

During my experience as a Full-Stack Developer at Flash Inc., I led cross-functional teams, managed project budgets, and enhanced NoSQL databases. My experience with JavaScript, Java, MongoDB, and REACT has honed my technical skills, making me a dept at handling large datasets and complex calculations. Additionally, my role as an Instructor/Program Coordinator at Youth Dream Canada has improved me with strong organizational and communication skills. I have successfully coordinated programming sessions, designed comprehensive curriculums, and instructed programming languages to diverse groups of students.

Thank you for considering my cover letter and resume. I am looking forward to the possibility of contributing to the company, and I would like to discuss how my skills and experiences align with the needs of the company.

Sincerely,
Hyungsoo (Henry) Park
